

 **How Review Keywords Trigger Google's Local 3-Pack Algorithm**

Google Maps utilizes **Review Justifications**. When customers include exact commercial phrases (e.g. "website developers in Nairobi" or "M-Pesa integration"), Google explicitly bolds that quote and elevates your listing above all competitors.

WhatsApp Request Script: "Hi [Client Name], hope the new website is working wonders for your business! If you have 60 seconds, could you please leave us a quick 5-star Google review? It helps Nairobi businesses find us. Direct link: [Insert GBP Short Link] — feel free to post one of the suggested draft reviews below or personalize it. Asante sana!"
